

First Term Exam in English

Text:

Artificial intelligence, or AI, is a type of technology that allows computers and machines to think and learn like humans. Today, AI is used in many parts of daily life. For example, phones can recognize voices, websites can suggest songs or movies we might like, and doctors can use AI to help find diseases more quickly. These tools save time and help people work more efficiently.

In schools, AI can make learning easier. Some programs can give students personal lessons and activities that match their level. In offices and factories, AI can do difficult or repetitive jobs, allowing people to focus on more creative tasks. This makes work faster and sometimes safer.

However, AI also brings some challenges. Many workers worry that machines might replace their jobs in the future. Some people also fear that AI might make unfair decisions if it learns from bad or biased information. Others are concerned about their privacy when personal data is used by AI systems.

Because of these reasons, people need to use AI wisely. Governments, companies, and schools should make clear rules about how AI is created and used. If used in the right way, AI can help society grow, make work easier, and solve problems that were once too hard for humans alone.

Comprehension Questions (5pts)

1. Give a title to the text. **Artificial Intelligence (AI)/ The effect of Artificial Intelligence/ What is Artificial Intelligence? ...etc. (1pts)**
2. What is AI? **It is a type of technology that allows computers and machines to think and learn like humans. (1pts)**
3. Give one example of AI in daily life? **phones can recognize voices/ websites can suggest songs or movies we might like/ doctors can use AI to help find diseases more quickly (1pts)**
4. How does AI help in school? **In schools, AI can make learning easier. Some programs can give students personal lessons and activities that match their level (1pts)**
5. Name one problem in AI.

. Many workers worry that machines might replace their jobs in the future. / People fear that AI might make unfair decisions if it learns from bad or biased information. / Others are concerned about their privacy when personal data is used by AI systems. (1pts)

Activity 1: Say whether True or False (4pts) **1pt for each answer**

- AI helps doctors find diseases **True**
- AI can make learning easier in schools **True**
- AI never causes job worries **False**
- People shouldn't use AI wisely **False**

Activity 2: Match the following concepts with their synonyms (2pts)

Concept = synonym
Quickly = fast 0.5 pts
Personal = private 0.5pts
Worried = afraid 0.5 pts
Difficult = hard 0.5 pts

Activity 3: Order the text main ideas (5pts) 1pts for each sentence order

- AI is technology that lets computers think like humans....1
- Today, AI is used in daily life....2
- However, AI brings challenges.... 3
- Workers worry about job replacement.... 4
- Used wisely, AI helps society grow.... 5

Written Expression (4pts)

Write a short paragraph answering the following question: “how does AI affect your life?”

You can use the following toolbox

Positive words:	help, easier, faster, safer, useful
Problem words:	worry, unfair, privacy, replace
Opinion words:	In my opinion, I think, For example

Ideas related to the instruction 1pts

Grammatically Correct 1pts

Punctuation 1pts

Originality 1pts
